

# 3° TRANSNATIONAL MEETING IN PORTUGAL

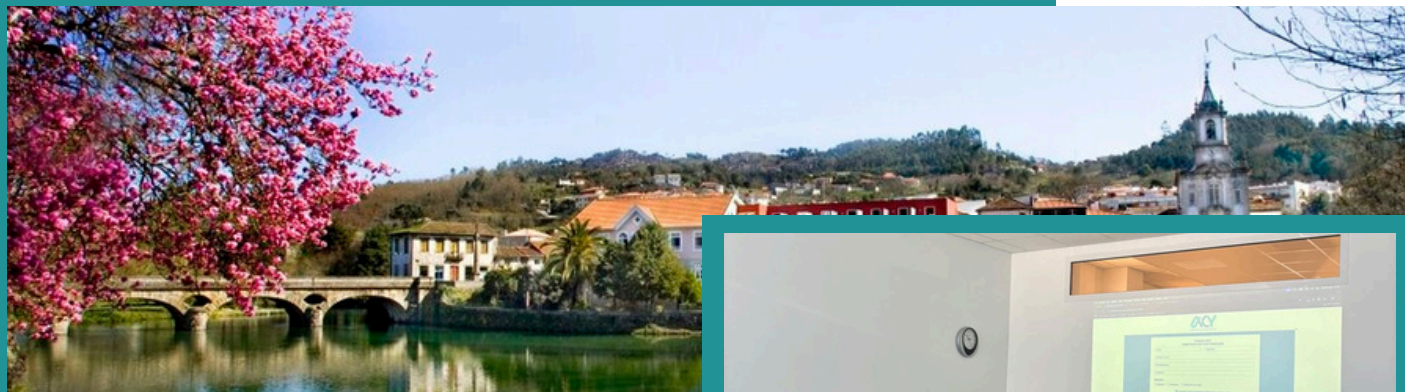

ARCOS DE VALDEVEZ - 17.06.2025

2023-1-ES01-KA220-VET-000153926

Co-funded by the European Union

AI-based Cybersecurity Training

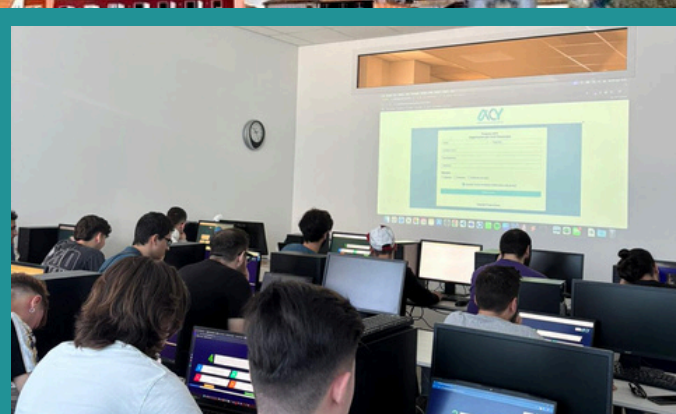

## The 3rd Transnational Meeting concludes: AICY partners gather in Portugal to propel the project forward and shape the future of cybersecurity education!

On June 17, 2025, the third and final Transnational Project Meeting of AICY - AI-Based Cybersecurity Training with Gamification Techniques was held in Arcos de Valdevez, Portugal. This key milestone brought together all partners for a thorough review of progress and a shared roadmap for the final phase. During the meeting, partners confirmed the full finalisation of the training materials, now uploaded to the interactive e-learning platform. All content is available in multiple languages and embedded in a gamified structure to enhance engagement and retention. All core features of the learning platform were successfully tested and validated. One of the major achievements was the integration of the AI-based self-assessment tool, now live on the platform. So, platform development is now officially complete, with all components functioning seamlessly. Meanwhile, the first three conferences took place in Italy, Poland, and Spain, allowing students and teachers to engage directly with the platform and provide valuable feedback.

### What's Next?

The coming months will focus on: Fine-tuning the platform based on user feedback; Organising upcoming conferences in Portugal, Belgium, and Turkey; Expanding outreach and visibility to promote long-term impact.

For ongoing updates on the meeting outcomes and future developments of the AICY project, please visit the official website: <https://aicv.eu/>.

29.05.2025, Infobasic Institute, Pescara, Italy

09.06.2025, Sala auditorio de Beaz, Bilbao, Spain

10.06.2025, Rzeszów University of Technology, Rzeszów, Poland
