2° TRANSNATIONAL MEETING IN ITALY

PESCARA - 17 SEPTEMBER 2024

AICY
AI-based Cybersecurity Training

The 2nd Transnational Meeting concludes: AICY partners gather in Italy to propel the project forward and shape the future of cybersecurity education!

STATE OF THE ART AND NEXT STEPS

On September 17, 2024, the 2nd Transnational Meeting of the AICY project—AI-Based Cybersecurity Training with Gamification Techniques—was held in Italy, marking a pivotal moment for consolidating the achievements made so far and charting the course for the upcoming months. During this productive gathering, partners collaborated intensively to review and approve the training modules developed, ensuring that all content aligns with educational objectives and maintains a high standard of quality. Additionally, plans were laid out for the process of uploading materials to the web platform, with clear timelines and specific responsibilities assigned to each partner. This meeting provided a comprehensive overview of the current status and facilitated the establishment of a shared strategy to advance the project effectively and collaboratively.

ABOUT GAMIFICATION

One of the standout features of the project is the discussion around integrating "Gamification" into the training modules. It was emphasized how gamification can enhance the learning experience, making it more engaging, interactive, and motivating for users. By incorporating playful elements such as points, badges, and instant feedback, skill acquisition is facilitated, and participant motivation is kept at a high level.

Photo group in Pescara

In summary, integrating gamification into the training modules makes learning more engaging and effective, paving the way for a dynamic environment that inspires active participation.

This meeting represents a significant milestone in our international cooperation journey, uniting partners from various countries with the shared goal of creating an innovative educational pathway in the field of Cybersecurity.
